**Frequency of bg level tracking:**

The frequency of bg level tracking has become worse from 5,6 to 4,9 The level of the frequency of bg level tracking is: excellent

**Calculated A1C:**

The A1C hasn't changed much (6,1 to 6) The level of the A1C is: excellent

**Standard deviation:**

The standard deviation hasn't changed much (56,7 mg/dl to 61,2 mg/dl) The level of the standard deviation is: good

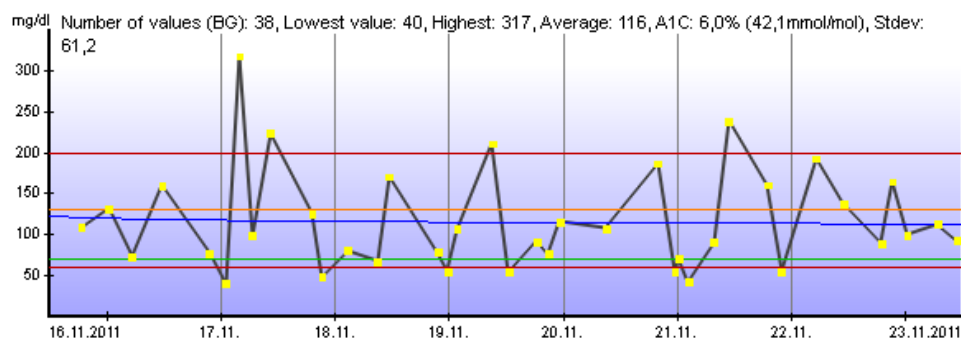

**Postprandial levels:**

Trend: Could not find enough values for a valid assessment. The level of the postprandial level is: excellent (-23 mg/dl (Ø from 1 numbers))

**Line graph**

The A1c is just an approx. value!
